

FAUCET SYSTEM ACCESSORIES

PLUG-IN 6 VOLT AC POWER ADAPTER

Model
AD01

FUNCTION:

The plug-in 6-volt AC power adapter is used as an alternate power source with AMTC's sensor faucet systems. The AC adapter easily plugs in to the faucet system to provide for many years of dependable operation and eliminates the need to routinely replace batteries. The AC adapter is recommended for high traffic facilities where the faucets get frequent use such as office buildings, restaurants, hospitals, schools, etc.

When the AC power adapter is used in conjunction with the standard battery pack, the batteries become a back up power source that continues to power the faucet system in case of an electrical power failure.
