

HYBRIDFLUSH[®] ACCESSORIES

6-VOLT AC POWER ADAPTER KIT

Model
AD801

FUNCTION:

The 6-volt AC power adapter kit is used as an alternate power source with AMTC's **HYBRIDFLUSH[®]** automatic/manual flush valve system. The AC adapter kit uses electrical power to operate the **HYBRIDFLUSH[®]** system to provide for many years of dependable operation and eliminates the need to routinely replace batteries. The AC adapter kit is recommended for high traffic facilities where the flush valves get frequent use such as office buildings, restaurants, hospitals, schools, etc.

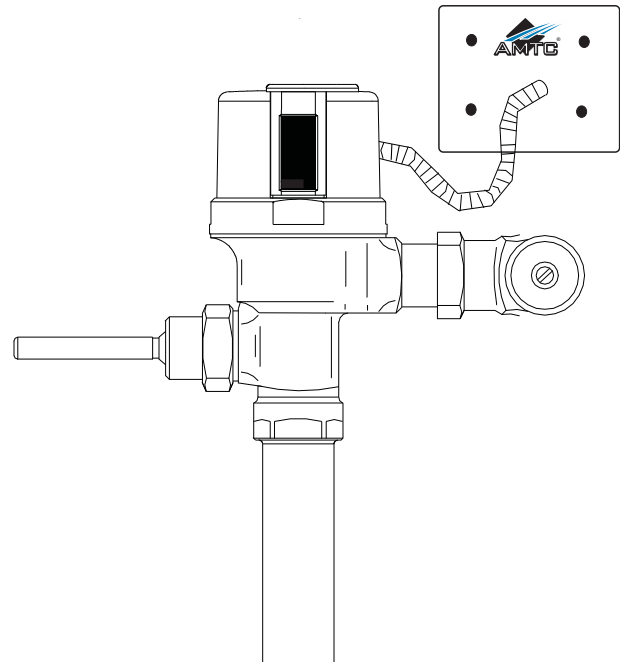

In case of an electrical power failure, the **HYBRIDFLUSH[®]** system can still be operated mechanically using the original flush handle or push button.

TECHNICAL SPECIFICATIONS:

Description:	6 Volt AC Power Adapter Kit
Power Jack Type:	Hardwired In Wall
Input:	Based on Transformer Used
Output:	6 VDC/ 500 mA
Wire Length:	24"
Conduit Length:	11"
Wall Plate Length:	4.5"
Wall Plate Width:	4.5"
