FOR IMMEDIATE RELEASE

The HEALTHFLO® Hands-Free Faucet System Offers Safe and Effective Hand Washing for Healthcare Facilities

CHATSWORTH, CA (February 2012) - AMTC is pleased to announce its HEALTHFLO® line of automatic faucets. The AMTC HEALTHFLO® hands-free faucet system offers safe and effective hand washing for healthcare facilities by using internal components that limit bacterial growth. AMTC's patented HEALTHFLO® motor driven mechanism eliminates magnetic solenoid valves and porous rubber or vinyl diaphragms which can harbor biofilm growth. The water velocity through the HEALTHFLO® valve is increased to flush it clean, and the tipping valve assembly cleans itself of debris that would ordinarily cause other mechanisms to weep. The system also eliminates rubber-orifice flow controls that can also harbor bacteria, and it is designed to flow at its specified flow rate regardless of variations in water pressure, without flow controls or outlet devices of any kind. Visit www.amtcorporation.com for more information.

About AMTC

AMTC is a leading manufacturer of advanced plumbing systems and water conservation devices for commercial applications. The company specializes in “touch-free” electronic flush valves, urinal and commercial toilet systems, electronic faucet systems, and electronic soap dispenser systems. All of AMTC’s electronic plumbing systems utilize its proprietary Micro-Cam Technology as a more reliable alternative to solenoid technology usually found in most competitor systems.
