## **FOR IMMEDIATE RELEASE**

### **AMTC Introduces the HYBRIDFLO® Model AEF-301 Automatic Faucet System**

WOODLAND HILLS, CA (November 2003) - AMTC introduces the HYBRIDFLO® Model AEF-301 Automatic Faucet System. The HYBRIDFLO® Model AEF-301 Automatic Faucet System is designed with advanced superior features for both commercial and residential applications. The HYBRIDFLO® Model AEF-301 comes in a variation of finishes including chrome (standard), polished brass, and nickel. The HYBRIDFLO® Model AEF-301 offers many advantages over existing faucet systems in terms of maintenance, sanitation, and performance. The hybrid design of the faucet system allows for alternate power options that include battery power and/or electrical power by way of an AC power adapter that easily plugs in to the control box. When the electrical power is used, the batteries become a back-up power source in case of electrical power failure.

#### **About AMTC**

AMTC is a leading manufacturer of advanced plumbing systems and water conservation devices for commercial applications. The company specializes in "touch-free" electronic flush valves, urinal and commercial toilet systems, electronic faucet systems, and electronic soap dispenser systems. All of AMTC's electronic plumbing systems utilize its proprietary Micro-Cam Technology as a more reliable alternative to solenoid technology usually found in most competitor systems.
