

AXIO[®] Touch-Free Technology

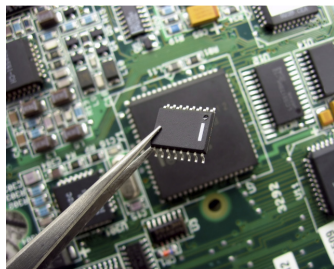

... Innovative Proprietary Technology Delivering Accurate, Dependable and Reliable Washroom Automation Performance!

Why Touch-Free Washroom Systems Featuring AXIO[®] Technology?

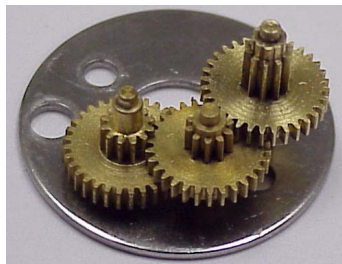

AXIO[®] Touch-Free Technology is Accurate!

It incorporates innovative digital infrared sensors that ensure precise activation and consistent performance. The unique sensor technology also allows for programming distance settings without the use of special dials or other delicate components easily damaged.

AXIO[®] Touch-Free Technology is Dependable!

It incorporates unique fully programmable water and humidity proof circuitry that allows for extended battery life and precise control of all sensor and electrical parts. **AXIO[®] Touch-Free** systems are designed to provide long term performance with corrosion free and vandal resistant components that are built to last.

AXIO[®] Touch-Free Technology is Reliable!

It incorporates high quality brass cam gear technology with a patented BRV[®] mechanism versus trouble-some solenoid mechanisms found in most competitive touch-free systems. By eliminating the solenoid mechanism **AXIO[®] Touch-Free** systems deliver unmatched reliability and cost effective maintenance free performance.

AXIO[®] is Accurate • Dependable • Reliable
