

# FAUCET SYSTEM ACCESSORIES

## MECHANICAL MIXING VALVE

Model  
MV

### FUNCTION:

The MV is used as a water mixing device with AMTC's sensor faucet systems. Mixing valves (MV) are used in applications where hot and cold water mixing is needed. The MV provides water at a safe and usable temperature in situations where the control of the temperature of the water discharging from a terminal fitting is of the utmost importance, i.e. within restaurants, hospitals, schools, nursing homes, etc.

The valve is designed to mix the flow of water discharging from the water outlets. The Mixing Valve (MV) is complete with check valves at both hot and cold inlets and is made of low lead brass.

### SPECIFICATION:

- For Use Under Counter
- Installs onto Valve Body
- Check Valves at Water Inlets
- 1/2" NPT Fittings on Inlets and Outlet
- Independent Hot and Cold Water Adjustment
- Low Lead Brass Construction
- Chrome Finish

### APPLICATION:

### CAUTION:

This is a mechanical hot and cold mixing valve only. THERE ARE NO AUTOMATIC WATER TEMPERATURE CONTROLS. Hot water in excess of 110 Degrees Fahrenheit (43 Degrees Celsius) can cause SCALDING.
